

A decorative graphic on the left side of the slide. It consists of a blue parallelogram and a light green parallelogram, both tilted at an angle. The blue shape is in the foreground, and the green shape is partially behind it. They are set against a dark blue background with faint, lighter blue diagonal stripes.

Web Frameworks Project

Title

Online Library Management System

Description

Our website comprises of:

Login Functionality where existing users can login to avail facilities provided by the Library.

Sign Up Functionality for new users to register themselves to the Library.

Homepage is a page where all the users who have signed up or logged in will be redirected.

Explore structure for users to add books into their cart.

About us section for users to know more about the library.

Github clone link: https://github.com/hritvikpatel4/web_frame_2019.git

PythonAnywhere Link: <http://amoghrajesh.pythonanywhere.com/>

Individual Contribution :

Hritvik:

Created all the super-users and managed the admin page.

Worked on models.py, views.py(signup_new, fronts, about,contact_new) and forms.py(signup).

Worked with respective template integrations.

Committed all the changes to Github.

Amogh:

Worked on linking all the CSS and images to the elements using static.

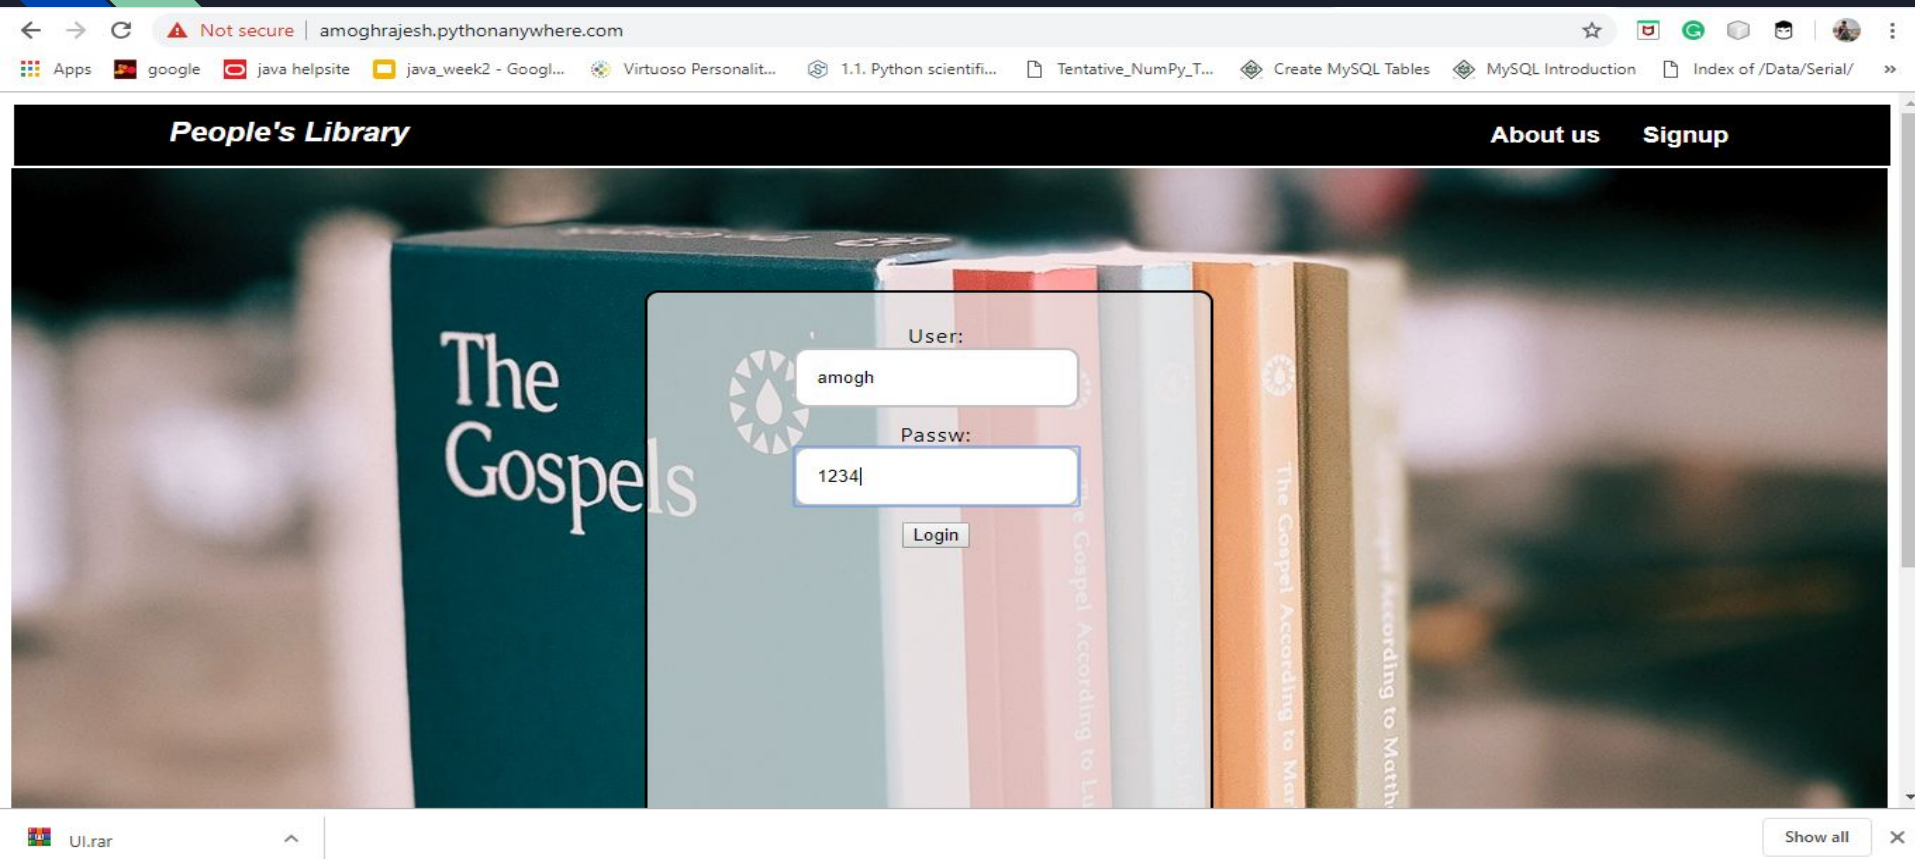

Worked with urls.py, forms.py(login) and views.py(login_new, people, explore_new).

Updation of database using forms in the template.

Worked with respective template integrations.

Set up the project on PythonAnywhere.com

Who are we?

People's Library is an American public library with headquarters in Washington. We're both an offline store and have one of the largest online libraries in the world. We have our offline stores in New York, Texas, Ontario in the US. We have our reach in other countries like UK, Spain, India, Belgium, China, Russia, Algeria, Austria, Japan. People's Library provides an option to purchase books as well as rent them by adding them into your online cart and probably reading them later. We ship to other countries either via Amazon or eBay or use Blueart so your package gets to you, safe.

Our History

Django administration

Home > Librarymanagement > Contacts

Select contact to change

Action:

- ☐ CONTACT
- ☐ Contact object (3)
- ☐ Contact object (2)
- ☐ Contact object (1)

Django administration

Home > Librarymanagement > Signups

Select signup to change

Action:

- ☐ SIGNUP
- ☐ abc
- ☐ amogh
- ☐ hritvik

Django administration

Home > Librarymanagement > Logins

Select login to change

Action:

- ☐ LOGIN
- ☐ amogh
- ☐ hello
- ☐ amogh
- ☐ hritvik
- ☐ amogh

Takeaways:

- We created Django models (namely login, signup and contact) and use a single template for login and signup (concept of extending templates)
- Redirection of pages using urls.py file in the root directory and the app directory.
- Adjusted CSS and other static content like images into the templates.
- Learnt how to change paths after a successful login, signup and contact.
- Successfully deployed the project on a external hosting site (pythonanywhere.com).

Challenges:

- Using a single template for two models(Login & Signup)
- Storing the details entered by user in the form to the database.
- Interlinking of the special directories(Static , Template).
- Deploying the project onto pythonanywhere.com due to project size being too large to upload on Github
- Linking various pages via anchor tags demanded creating new views and an associated url mapping.
